

SEB Equator Principles reporting

Reporting year 2011

In 2007, SEB adopted the Equator Principles (EP), a voluntary set of guidelines used by financial institutions to assess the social and environmental impact of large projects and to help their customers to manage them. Signatory financial institutions are required to apply the Principles to project finance deals amounting to more than USD 10 million. The Principles, which typically apply to complex installations such as power plants, refineries and waste treatment plants, have contributed to developing and operating such large projects in accordance with good international practice.

During 2011, SEB was involved in twelve financings reported under the Principles. SEB also participated in the consultation process, together with the Equator Principles Association and other signatory banks, regarding developing of EP III. In October, a tailored EP training was arranged for 30 advisors and client executives in the international team.

Equator Principles, reporting year	2011	2010	2009	2008	2007
Total number of transactions approved	12	10	0	7	6
Category A transactions approved	Number 1	0	0	0	0
Category B transactions approved	Number 7	7	0	7	6
Category C transactions approved	Number 4	3	0	0	0
